AI PRODUCTS & OPERATIONS | AI EVALUATION | AI GOVERNANCE | JD

SUMMARY

JD who builds AI products and runs them in real use: WiM and Lavrentiy, voice-to-intent apps for Android and Windows with a 35-claim patent application; Bakers Agent, a Google Cloud system running a live business's marketing behind human approval gates; NoiseFile and Heirloom on Google Play; and published research on AI correction burden. Earlier: multistate tax controversy at Andersen, a federal benefits decision affirmed on appeal, and a $1.75 million regulated buildout.

AI DEVELOPER & INDEPENDENT RESEARCHER | Self-Employed | June 2025-Present

- **WiM and Lavrentiy:** Built voice-to-intent apps for Android and Windows: the user speaks, and clean text lands in the app in use. A speech-disfluency layer lets the user end the recording, detects blocks and covert word substitutions, and asks at most three clarifying questions. WiM is in Google Play testing; Lavrentiy v1.7.11 installs on Windows and works offline.
- **Patent:** Sole inventor on a 35-claim U.S. provisional patent application covering the combined mobile and desktop architecture (App. No. 64/100,336; filed June 27, 2026).
- **Research:** Wrote *Invisible Work* (Feb 2026), a measurement of the human correction burden across many-turn AI conversations, answering a gap Anthropic named in its January 2026 paper; built the open-source Drift Auditor behind it and submitted the paper to Anthropic's research team. Earlier: *12 Rules for AI*, *AEGIS*, *Air-Gapped Compilation*.
- **Own model:** Fine-tune GLM-4.5-Air with QLoRA on an H200 from hand-written training cards, versioned and probe-tested through eleven releases, served on Modal, to train out hedging and false completion claims (adapters on Hugging Face).
- **Bakers Agent:** Built and operate a Google Cloud system (40+ Cloud Functions, React/TypeScript dashboard) that runs a live business's marketing behind human approval gates: photos become approved posts on Google Business Profile, Facebook, and Pinterest; Search Console findings become GitHub pull requests with a quality gate; review replies are drafted for approval; one dashboard tracks traffic, search, reviews, social reach, and payments. Shared backend for WiM and Lavrentiy; Bakers Agent 2, multi-client, is in progress.
- **Agent Bridge:** Built an agent that operates the owner's own phone and laptop: it reads notifications, drives apps on hidden screens, reads SMS sign-in codes, and pauses for approval before any irreversible step.
- **Published apps and legal tools:** NoiseFile on Google Play, a local-first Android app that turns the noise codes of 36 Bay Area cities into 108 complaint workflows; Heirloom, which restores old family photos with an image engine behind a credit ledger and a GPU backend, in Google review for production; Audit Ledger, a tamper-evident California residency audit-defense system (19 *Bragg* factors, SHA-256 hash chain).
- **Client and business sites:** Built and operate mybakingcreations.com (117 pages, 1,414 commits, PayPal checkout, chatbot). Delivered a paid website and field-operations app for a private-jet detailing company.

LEGAL, TAX & REGULATED OPERATIONS

Andersen - Senior Associate, State & Local Tax | San Francisco | November 2023-April 2025

- Managed multistate tax compliance and controversy for corporate and startup clients, including audit defense, refund claims, voluntary disclosures, and nexus reviews; led engagements disputing the state tax treatment of major technology transactions and negotiated audit resolutions that reduced client liabilities.
- Used LLM tools to analyze public-company SEC filings for active audits, litigation, and credits-and-incentives positions; drafted memoranda across income/franchise and sales-and-use tax.

Phenotopia - Chief Operations Officer | Santa Rosa | February 2021-May 2023

- Directed a $1.75 million retail buildout through permits, construction, final municipal inspections, and opening; managed contractors, engineers, consultants, municipal departments, vendor contracts, MSAs, NDAs, purchasing, and SOPs. The business remains open.
- Separately authored the 33-page conditional-use-permit application for a 9,990 sq. ft. cultivation, distribution, and non-volatile manufacturing facility and assembled its 11 exhibits from five outside firms (about $300,000 of work) through 16 months of drafts and city review; the project won unanimous local approval and state licensing.

Andersen - Associate, State & Local Tax | August 2018-January 2021

- Conducted nexus studies, multistate compliance reviews, and exposure analyses across 20+ jurisdictions; supported audits, voluntary disclosures, refund claims, and controversy matters (intern from February 2018).

EARLIER LEGAL EXPERIENCE

U.S. Department of Labor, OALJ - Judicial Extern to ALJ Richard M. Clark (2017): drafted the 23-page Decision and Order in a Defense Base Act psychological-injury claim, weighing conflicting expert opinions and symptom-validity testing; affirmed by the Benefits Review Board, *Baba v. SOS International, LLC*, BRB No. 17-0440 (Jan. 30, 2018).
IRS Office of Chief Counsel - Legal Extern (2017) | **USPS Pacific Area Law Office** - Legal Extern (2017)

EDUCATION

UC College of the Law, San Francisco (UC Hastings) - JD, Tax Concentration, 2018 | CALI Award | Production Editor, *Hastings Business Law Journal*
University of California, Berkeley - BA, Political Science; Minor, Southeast Asian Studies, 2015 | 3.85 | Distinction in General Scholarship
